

IN THE CLAIMS

Please cancel claims 1-52 without prejudice or disclaimer of the subject matter contained therein.

Please add claims 53-75, as follows:

x2

54 53. A toner particle adapted for use in electrostatic image formation comprising:
a polymer; and

flakes of metal dispersed in the polymer.

55 54. A toner particle according to claim 53 wherein the flakes of metal have a dimension
greater than about 4 micrometers.

56 55. A toner particle according to claim 54 wherein the flakes of metal have a dimension
greater than 6 micrometers.

57 56. A toner particle according to any of claims 53-55 wherein the metal flakes comprise
gold.

58 57. A toner particle according to any of claims 53-55 wherein the metal flakes comprise
silver.

59 58. A toner particle adapted for use in electrostatic image formation comprising:
a polymer; and

a particulate fluorescent material, dispersed in the polymer.

60 59. A toner particle according to claim 58 wherein fluorescent material is in the form of
particles having a size greater than 2 micrometers.

61 60. A toner particle according to any of claims 53-55 wherein the polymer is a low molecular
weight ionomer.

09322174-052899

P16045.A01

62. A toner particle according to claim 56 wherein the polymer is a low molecular weight ionomer.

63. A toner particle according to claim 57 wherein the polymer is a low molecular weight ionomer.

64. A toner particle according to any of claims 58 or 59 wherein the polymer is a low molecular weight ionomer.

65. An electrified toner particle according to any of claims 53-55.

66. An electrified toner particle according to claim 56.

67. An electrified toner particle according to claim 57.

68. An electrified toner particle according to any of claims 58 or 59.

69. A liquid toner comprising:

a plurality of toner particles according to any one of claims 53-55; and

a carrier liquid.

70. A liquid toner comprising:

a plurality of toner particles according to claim 56; and

a carrier liquid.

71. A liquid toner comprising:

a plurality of toner particles according to claim 57; and

a carrier liquid.

P16045.A01

71. A liquid toner comprising:

a plurality of toner particles according to any one of claims 58 or 59; and

a carrier liquid.

72. A printed image printed with a process utilizing a liquid toner according to claim 68.

73. A printed image printed with a process utilizing a liquid toner according to claim 69.

74. A printed image printed with a process utilizing a liquid toner according to claim 70.

75. A printed image printed with a process utilizing a liquid toner according to claim 71.---

REMARKS

Entry of this amendment is respectfully requested prior to examination of the application and calculation of filing fees.

The amendment herein is being presented to include changes to the specification as entered in the parent application, as well as to include the appropriate reference to the parent applications for priority purposes. Additionally, claims are being presented for examination in this divisional application.
